

OPEN_QUESTIONS.md

Status: Phase 0 deliverable - for review. Answers unblock Phase 1+ and become decisions in DECISIONS.md. Each proceeds on the safer default until answered.

Organisation & people

1. Which legal entity / business is the pilot? Name, country, currency, timezone, tax IDs? Safer default: single entity, Sri Lanka / LKR / Asia-Colombo (matches Sasiri context).
2. The ~5-15 staff: names, roles, managers, branches/departments? Who is owner_admin, manager, finance?
3. Authority thresholds: expense self-approve limit per role; finance-review threshold; who may verify tasks; who may reactivate employees; who approves QuickBooks drafts? Safer default: employees can approve nothing; all sensitive actions require manager/finance approval until thresholds are set.

Finance / QuickBooks

4. QuickBooks entity(ies) and is a sandbox company available? _Safer default: sandbox-only until confirmed; production stays draft-only._
5. Chart-of-accounts / tax-code expectations for expense mapping? Who is the accountant reviewer for uncertain tax?
6. Retention appetite for financial records and event payloads?

Channels

7. WhatsApp number strategy: a separate WhatsApp Business number for staff ops (recommended), or share the Sasiri sales number? Safer default: separate number.
8. Are approved WhatsApp message templates available for business-initiated staff messages outside the 24h window?

Privacy / gated

9. Timeline and owner for the GPS/CCTV/attendance privacy gate (notices, policy, retention, legal review)? Default: out of scope until explicitly cleared.
10. Any regulatory constraints (data residency, labour law) affecting attendance, monitoring, or employee data?

Ownership / process

11. Who are the sign-off owners: management (scope), finance (accounting/payments), privacy/legal (gated features)?

12. Where do staging vs production Supabase/Vercel/Inngest/QuickBooks accounts live, and who administers them?

13. Alert owners per alert type (dead-letter, cost spike, integration down)?
